

# 4MILK

Work- or meeting table with fixed or electrical height adjustment

## Description

4MILK was designed by Søren Rose in collaboration with HOLMRIS for those who work in a very collaborative environment or who have a small office space. 4MILK is one desk with room for four people, which means that you and your colleagues are able to create a shared workspace that is still large enough to ensure privacy and focus during the day. Thus, 4MILK is very practical and functional.

4MILK is part of the MILK collection, which is characterized by its minimalistic design that makes the whole series very versatile and applicable in many different settings. The simplicity also makes room for your creativity and personality when creating an interior design solution with a MILK desk.
