

# GENESE café

## Description

The GENESE café table was designed by the Danish design-duo Voss & Hedlund together with Holmrís as part of the GENESE collection. The whole collection is produced by HOLMRÍSs in Denmark to ensure high quality and service.

This café table is a minimalistic and stylish table for cafeterias, meeting areas, lounges, and receptions, so the table is very versatile and useful in many different ways. There are two different GENESE café tables – one with a three-legged frame and one with a four-legged frame. The tabletop is slightly bigger with the four-legged frame. It is also possible to choose between a square or round tabletop. Thus, there are many options to personalize and fit the table perfectly into any given space.
